

IT services How we work

inspiring
people

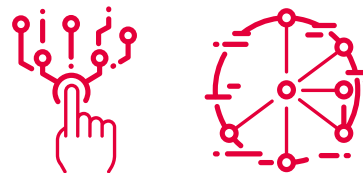

You can expect a powerful and up-to-date network

An event or conference cannot do without IT. Streaming, voting, internet access or services such as heat mapping have become increasingly important during events.

To meet your IT requirements, our IT product specialist will go through the various stages with you. During the preparation stage, you will have a single point of contact who will help you make the right decisions at the right time. As soon as the build-up of the event starts, our operational IT department will take over as they fully understand any challenges that may occur on the floor.

Your benefits

- > Our IT team is your contact during preparations and realisation and is responsible for all communication with suppliers and other departments
- > We translate your required functionalities and IT demands into technology and implementation, providing the best IT options for you
- > Our IT product specialist is pleased to share the latest news and developments in the field of IT

Good to know

Preparing for the event involves the following stages:

1. Together we'll perform an analysis of your demands and requirements
2. You will receive a clear proposal
3. After approval of the proposal, you're brought into contact with the operational IT department who will build your solution
4. You'll discuss the planning with the operational IT department
5. During the build-up of the event, you'll be in direct contact with the operational IT department
6. After the event, we'll evaluate the solution and cooperation before sending an invoice

We offer

- > Your goals, demands and functionalities translated into technical opportunities
- > Experienced IT specialists

Making life easy

We provide a complete package of full-service IT products and customised services.
