IT services
Network
connections

Your
own network
in RAI Amsterdam

At the RAI we offer you powerful network connections so your IT specialists can set up virtual networks for activities such as registration, presentation management, narrowcasting (Room information/Overflow) and sharing internet connections (IP range). This specialist service means you can temporarily equip the RAI complex with your own full-scale network.

We offer
> An optimal and configured network
> The option of both standard and
  complex connections
> A flexible configuration
> Security, fast delivery and installation
> A layer-2 network connectivity
> Advice from our IT Specialist

Transparent VLAN connections
With a transparent VLAN (TP VLAN) connection you can create a temporary and virtual network in RAI Amsterdam.

To transport data quickly and safely, these connections require specific properties and conditions.

Properties and conditions
> Our network is protected against
  unwanted spanning tree traffic
> Broadcasting traffic is limited to 10%
  of the available bandwidth on your VLAN
> Your team must include an IT specialist
  with sufficient network knowledge (TCP/IP)
> You exclusively use the specialist network
  equipment of RAI Amsterdam

Making life easy
