

SUSTAINABLE CHOICES FOR YOUR EVENT

FOUR KEY AREAS WITH ASSETS FOR GREATER IMPACT & REDUCING EVENTS FOOTPRINT

02 LOGISTICS & MOBILITY

With our RAI Vision 2030, RAI Amsterdam logistics infrastructure will be fully transformed to become completely emission-free, smart, and more efficient.

Alongside our plans to create a fully sustainable logistics system in the coming years, we are already working with our partners and the City of Amsterdam to deliver cleaner logistics and mobility solutions today.

HOUSE OF EVENTS HOME OF YOUR INDUSTRY

Towards a climate neutral RAI

Amsterdam in a climate neutral city

Currently, lorries powered by fossil fuels are used to transport goods in and out of the RAI site. Sixty percent of the lorries – more than 60,000 movements per year – entering and leaving the site pass through residential areas. Together with the City of Amsterdam, we have developed a plan that will increasingly keep truck traffic away and provide a variety of sustainable transport options.

Make the most of valuable insights to reducing your event footprint

We can help you maximise every asset and achieve your own sustainability goals. Here are a few ideas – please feel free to contact us to find out more:

- > **By train – travelling from Europe saves 70-90% of CO2 emissions**
- > **By air – direct flights save emissions and offsetting flight CO2 is a responsible choice**
- > **By public transport – RAI station is 10 minutes from Schiphol with direct connections. This way you can save both time and CO2 emissions**
- > **By car – opt for electric cars and share with colleagues to reduce emissions**

Logistics & Mobility highlights – current sustainable developments and assets for your event

THE FUTURE OF AMSTERDAM ZERO-EMISSION & FULLY ACCESSIBLE

Zero-emission only vehicles in the city by 2030

55% less CO2 emissions by 2030

Natural gas free by 2040

Climate neutral & fully circular by 2050

REDUCING EMISSIONS, IMPROVING MOBILITY & QUALITY OF LIFE

Improve traffic flow on the A10 ring road

Limit logistical movements & fossil fuel consumption

Member of the Green Deal Zero Emission City Logistic

Local and regional products & suppliers

Reduction in harmful SO2 & NOX emissions

FRAMEWORK FOR A SUSTAINABLE URBAN MOBILITY HUB

Bicycles available for hire on our venue premises

Working towards a fully electric taxi fleet with our partner TCA

The RAI's own metro, tram & train stations – easy access to fast, safe & climate-neutral public transport
