# ITS Austria – digital transformation in mobility

- Platform of the Austrian ITS actors
- Member of ITS Nationals
- The public sector (on all levels) plays a central role
- infrastructure and transport operators, industry, research and education
- Based on the transport policy objectives, ITS Austria defines priorities in the focus areas of digital infrastructure, connectivity and multimodality.
- An important premise is the freedom of choice in a multimodal mobility offer for users throughout Austria, both in urban and rural areas.

# Data and Interfaces

- One National Access Point to mobility relevant data

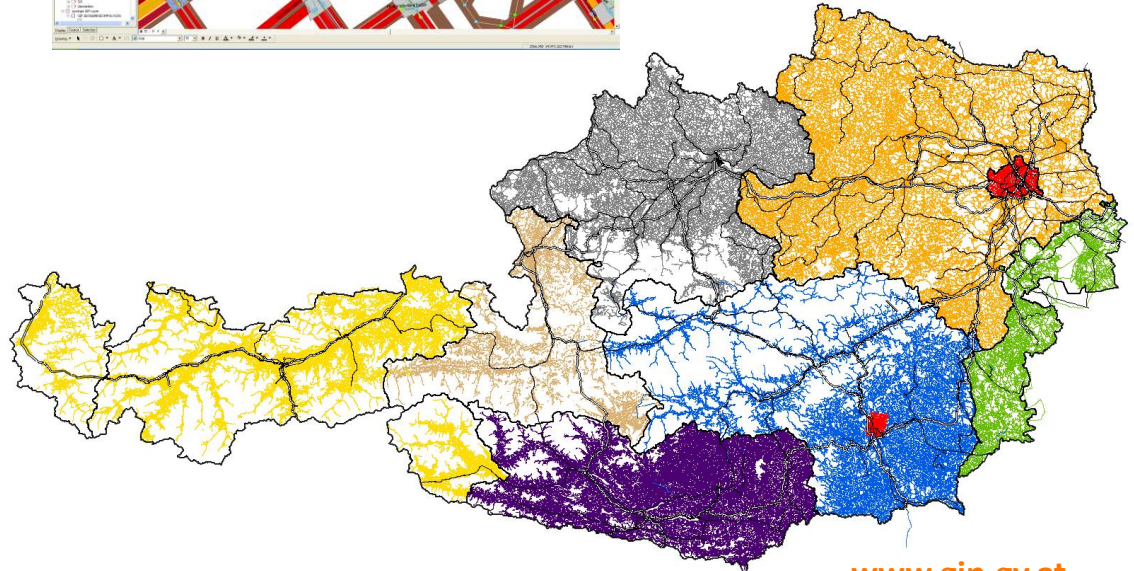

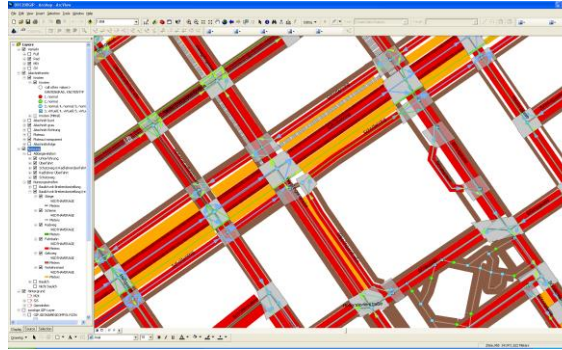

- 94 datasets
- 36 data holders

[www.mobilitydata.gv.at](http://www.mobilitydata.gv.at)

## Data and Interfaces

- One National Access Point to mobility relevant data
- One Austrian wide transport graph setup decentralised

[www.gip.gv.at](http://www.gip.gv.at)

## Data and Interfaces

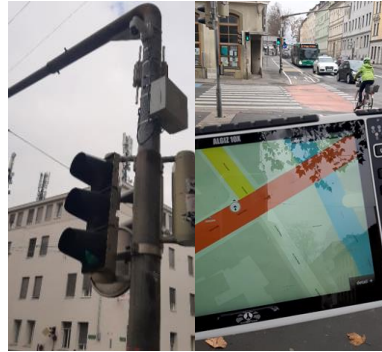

- One National Access Point to mobility relevant data
- One Austrian wide transport graph setup decentralised
- One Austrian wide real-time traffic situation information system (based on multi-stakeholder cooperation)

[www.evis.gv.at](http://www.evis.gv.at)

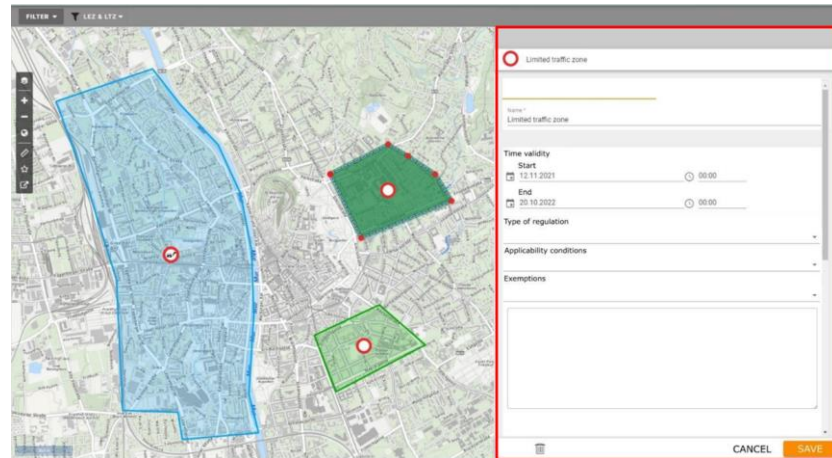

# Integrated traffic management

- Priorities are set to work towards an integrated multimodal mobility/traffic management system
- Working towards cooperative ITS (C-ITS) solutions

# Integrated traffic management

- Priorities are set to work towards an integrated multimodal mobility/traffic management system
- Working towards cooperative ITS (C-ITS) solutions
- And looking on information about Urban Vehicle Access Regulations (UVARs)

# Integrated mobility services

- Setting up one multimodal traveller information service (white label) as basis for several end-user information services – Travel Information Austria (VAO)

# European ITS Associations – cooperation for the users' benefit

It's all about harmonising data access, service integration and traffic management – within and across borders!

# Thank you!

**Martin Boehm**
