The problem:

The solution:

DynaSwitch:

Proof of concept:

Between March and October 2022, our solutions for contraflow traffic management were successfully used for several months in various Autobahn GmbH projects.

- 93 Pfreimd – Nabburg
- A7 Rothenburg ob der Tauber
- A3, Hamminkeln – Wesel
- Leipzig – Halle

We have succeeded in reducing congestion times between 50 and 100%.

The more asymmetrical the traffic flows are, the greater the benefit of using alternating traffic management.
