# Shared and Digital Mobility Hubs

**Goal:** Improve sustainable **multi-modal accessibility** of North Sea Region - cities for citizens, tourists and commuters, for **modal-shift**.

- **How?**
  - Introducing shared mobility hubs and/or by upscaling them.
  - Applying a **holistic approach**, (policies, incentives and action plans)
- **What?** Providing concrete support to public authorities regarding:
  - The implementation of hubs
  - training and knowledge dissemination.
  - Integrating hubs into the PT network and MaaS ecosystem

# What are mobility hubs?

- Physical clusters of shared and electric mobility modes
- Brings together e-(cargo)bikes, e-scooters and/or e-cars and charging infrastructure
- Can vary in size, type of location, and type of offer
- Tailored to local conditions & needs
- Can be linked together in a network, can be connected to the PT-network
- Integration with transport system through MaaS

# Why do we need mobility hubs?

## Household growth

More people, more mobility

## Space Demands

Invest in the best

## Shared Mobility

New services for a multimodal shift

## Mobility Hubs

Spatial and digital quality

## Repurposing is easy

Minimal transformation for big changes

## Inclusive and green

Connecting people (rural) while promoting safer and greener spaces

# Output of the project

- **Pilots**

- *Skien/Porsgrunn, Tønsberg: integration of hubs into PT*
- *Rotterdam, Leuven: specific target groups*

- **Upscaling**

- *Amsterdam & VRA*
- *Vestfold og Telemark*
- *Leuven*

- **Replication**

- *Provincie Utrecht*
- *Region Hovedstaden (Kopenhagen)*
- *Rotterdam*

- **Digitalisation plans**

- *Leuven*
- *Vestfold og Telemark Region*
- *Amsterdam & VRA*
- *Provincie Utrecht*

- **Support outside the project**

- *14 cities*
- *6 regions*
- *4 PT operators*
- *4 MaaS-providers*
- *12 shared mobility providers*

# Partnership

## Regional authorities and cities

PROVINCIE :: UTRECHT

The Capital Region of Denmark

ShareDiMobiHub

Utrecht region: 75+K homes by 2030.

Electric driving: Urban energy transition.

MaaS: Efficient transport.

Sustainable mobility: Shared solutions.

Authorities: Active involvement.

Challenges: Knowledge gaps, capacity, harmonization.

Local initiatives: Promote shared mobility.

Focus Shared Mobility: Large cities vs. regions.

Regional cooperation: Overcome obstacles.

# Upscaling plan neighbourhoodhubs (2023 – 2025)

---

- Transition of Ehubs locations + around 20 new locations
- Co-funded bij National and Regional transport authority
- Connection with city wide shared mobility system -> no free floating around the hub
- National look and feel hubs
- Location selection criteria:
  - Public transport locations
  - Outskirt areas with low numbers of shared mobility (policy goal)
  - Areas where parking regulations are introduced
- Hubs in the historic centre and 'De Pijp' area as alternative for freefloating
- Spring 2023 – summer 2024: tender SM provider specially for neighbourhood hubs
- Summer 2024 and onwards: new SM providers which operate citywide (freefloating & hubs)

# Vervoerregio Amsterdam

Problem: Car dominance in Amsterdam suburbs  
PT isn't the sole alternative

Problem: Business Case for shared mobility within suburbs does not grow naturally in the pace we'd like  
Problem: Policy fragmentation poses obstacles in providing and usage

Solution: An integrated regional framework

# Municipality of Rotterdam: help change travel behavior

Shared mobility as an alternative for private car use.

1. **Understand** the neighbourhood **needs and obstacles**
2. **Determine** the need and **effectiveness** of nudging and supporting tools
3. **Develop** and **implement** the tools

**Be aware**

*Video with example*

**Consider**

*Promocode*

**Try out**

## Inclusive Mobility

- Making sure that mobility hubs are **accessible for all** potential users
- **Hub Inclusivity Test** – to be launched soon!

## Digitalization

- Support project partners in developing **digitalization plans**
- **TOMP-API**: standardized data-exchange between Transport Operators and MaaS Providers
