

# The Golden Bike- Train Combination.

Chris Bruntlett, Dutch Cycling Embassy  
Marise Bezema, NS  
Simone Jorink, Movares  
Roland Kager, Studio Bereikbaar

# Dutch Cycling: For a Cycle-Friendly World

The Dutch Cycling Embassy is a vast network of public and private organizations from the Netherlands who wish to share their knowledge and expertise to help cities experience the many advantages of cycling.

Experience the Dutch cycling culture first-hand

Think about best possible solutions and achievable results

Act by applying these solutions to your local context

Learn more about effective policies and best practices

# DCE Public-Private Partnership

“THE BICYCLE IS NOT AN ALTERNATIVE TO THE CAR. NEITHER IS THE TRAIN. THE COMBINATION, THOUGH...” – MARCO TE BROMMELSTROET

Figure 1. Mechanism of increased catchment areas

[bit.ly/dcebiketrain](https://bit.ly/dcebiketrain)

Figure 2. Mechanism of increased choice

How does integrating cycling and public transport improve regions? It increases:

1. Catchment areas
2. Station choice
3. Personalisation/customisation
4. Market base
5. Competitiveness of transit
6. Liveliness of public space
7. Agglomeration effects

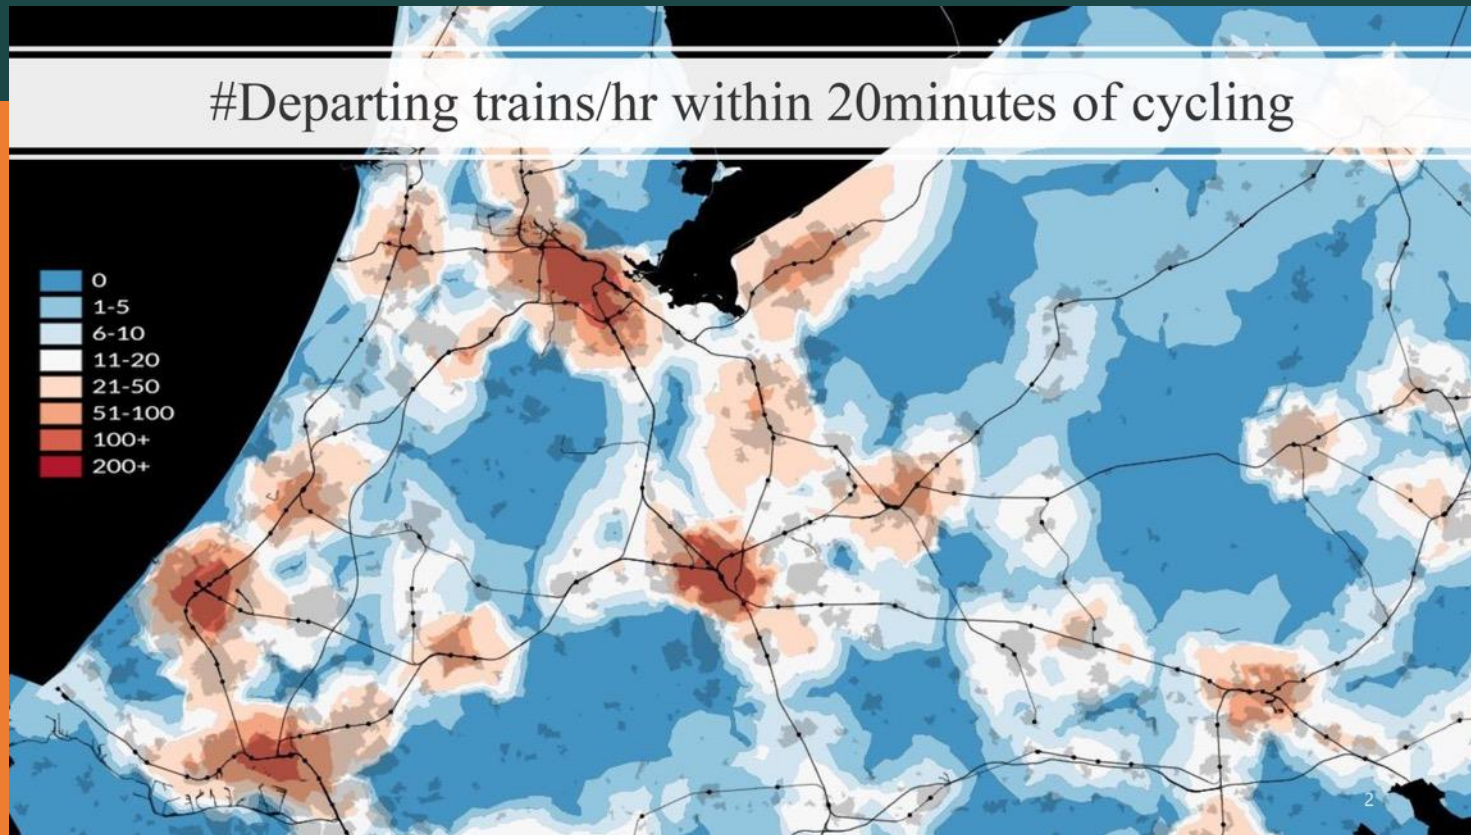

# The Magical Bike-Train Combination: More Riders, More Cyclists, Fewer Cars

- o>o Roughly HALF of all train journeys in the Netherlands begin with a bicycle ride to the station (approximately 650,000 journeys per day)
- o>o Nearly a quarter ALL kilometers cycled in Dutch cities are to or from a station
- o>o 21% of bike-train trips replace car trips; 66% of bike-train users have access to a car but prefer not to use it
- o>o 20% of Dutch people live within one kilometer and 80% live within five kilometers of at least one station

# Providing a seamless trip

- Available
- Safe
- Affordable
- Easy to use

- Available at nearly 300 locations; mostly railway stations but also at bigger public transport hubs.
- The seamless trip pyramid also applies here: OV-Fiets present, available and easy to use.
- We have 26.000 bikes and in 2023 travellers made 6,7 million trips
- Popular with travellers for their last mile
- Less second bikes at destination
- Less demand for taking a bike into the train

# Operational excellence

Tailormade solutions per type of station:

- A guarded parking option with staff at the largest garages (#56)
- A guarded self service option for the mid-size garages (#53)
- OV-Fiets for rent
- Bicycle repair shops (#33)

Uniform operation in our parking garages; standard processes for travellers, parking enforcement and safety.

2018/2019

**Note 1: These trends are diverging in time**

**Trip-generation: total distance of daily trips generated per resident, per mode, controlled by urbanity of home location**

2018/2019

**Note 2: Not just modal split, also trends in #km/day**

Trip-generation: total distance of daily trips generated per resident, per mode, controlled by urbanity of home location

2018/2019

Trip-attraction: total distance of daily trips attracted per resident or job, per mode, controlled by urbanity of trip destination

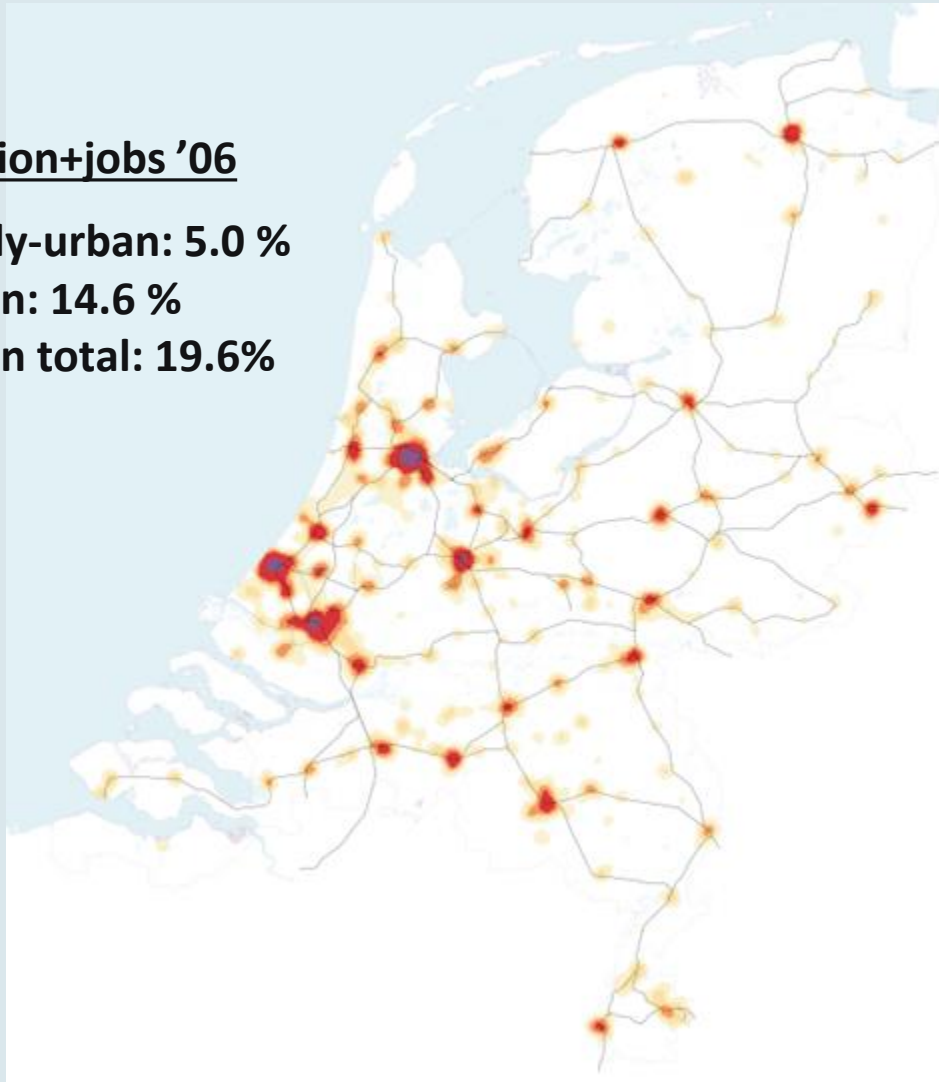

**Note 3: Not just trends in trip generation also in trip attraction**

### Population+jobs '06

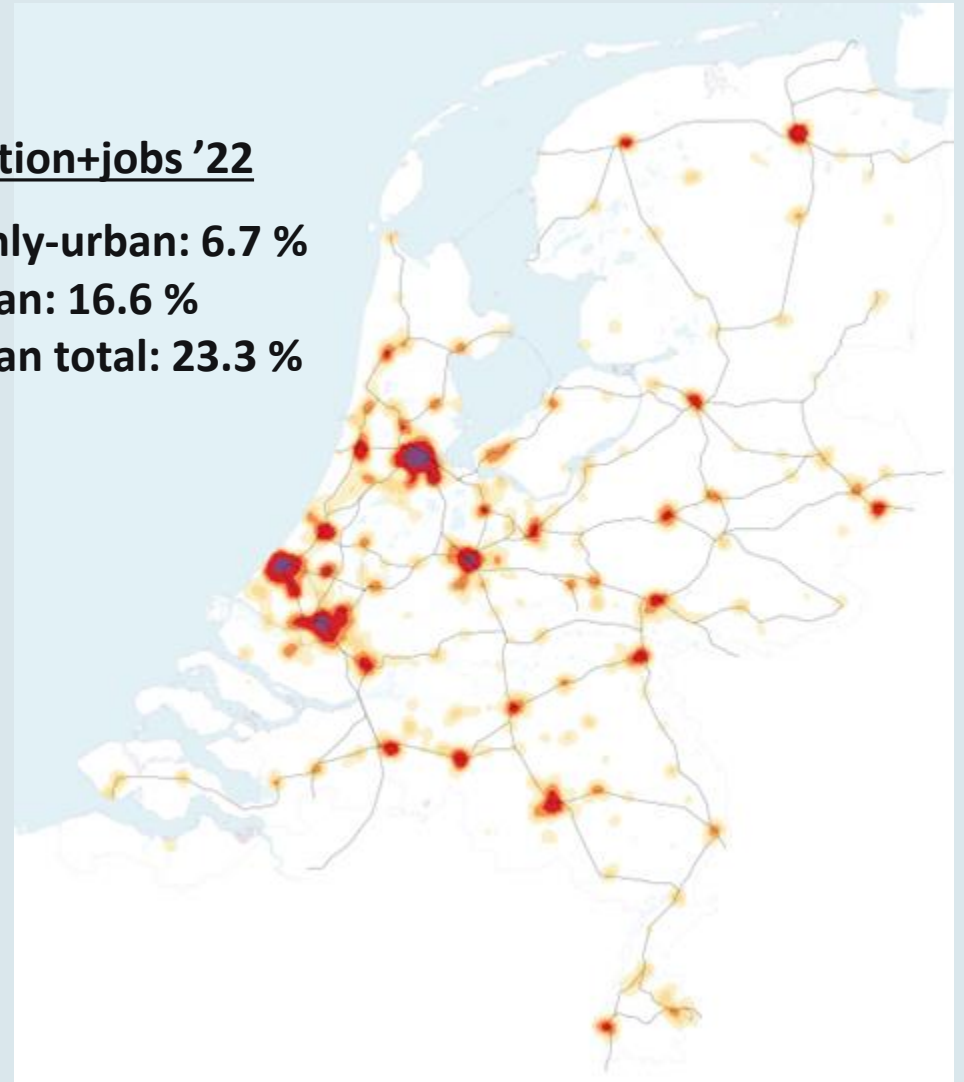

- Highly-urban: 5.0 %
- Urban: 14.6 %
- Urban total: 19.6%

2006

### Population+jobs '22

- Highly-urban: 6.7 %
- Urban: 16.6 %
- Urban total: 23.3 %

2022

**Note 4: Urban centres increasing in weight**

Maak kennis met de belangrijkste reiziger die nog geen naam had: de treinfietsers

- + Increased share of population + jobs residing in urban locations.
- + Increased share of trip attraction to urban locations. Also by non-urban residents.
- + Less space for traffic/transport in/around urban locations (=push for space-efficient modes)
- + Urbanisation (on average) occurs at fastest pace at increased distances from 'established' centres or transit hubs
- + Year-by-year divergence of above trends
- + 'Bike+train' has serious challenges for delivering the required upscaling...
  - ... but much less so than cars or public transport alone would have (or cycling alone)
  - ... and 'bike+train' has a track record: it accommodated rapid urban growth 2006-2022

## Effects of rise of city for bike+train
