

**Bridging East and West
in Remanufacturing
Let's meet in Guangzhou**

JOIN US IN GUANGZHOU

Join the electrifying Rematec Asia and immerse yourself in a dynamic gathering of countless remanufacturing trailblazers. Set in the vibrant city of Guangzhou, this extraordinary event ignites a powerful synergy among professionals, fueling the exchange of cutting-edge knowledge, forging invaluable connections, and cultivating enduring partnerships in the region. Brace yourself for a thrilling opportunity to establish a global presence that propels your success throughout the year. Don't miss out on this exhilarating experience that promises to unlock endless possibilities!

Conforming to the national strategy, remanufacturing has entered a new era of standardized development.

Hainan Province revealed its “14th Five-Year Plan” in August 2022, aiming to develop the remanufacturing industry and achieve a 2 billion yuan scale by 2025. In February 2023, the National Development and Reform Commission introduced the “Ten Actions for Carbon Peaking” and proposed the “Action Plan for Carbon Peaking by 2030.” These actions emphasize the need for standardized development in the remanufacturing industry, supported by the Interim Measures for Standardized Management of Auto Parts Remanufacturing.

Furthermore, in March 2023, multiple departments, including the National Development and Reform Commission, jointly issued the “Guiding Opinions on Coordinating Energy Conservation, Carbon Reduction, and Recycling.” This included the “Guidelines for the Implementation of Motor Renovation and Recycling (2023 Edition)” to accelerate the refurbishment and recycling of motors in key areas.

China’s auto parts remanufacturing industry has witnessed the rise of leading companies, establishing robust research,

development, and manufacturing systems. The industry has expanded to include three-electric systems and power batteries for new energy vehicles. These favorable policies are set to drive significant market growth, offering unprecedented prospects for the industry.

Revolutionizing the Remanufacturing Industry

With “zero carbon emissions” as Europe’s target by 2050, new energy vehicles hold the key to the future. As global remanufacturing companies eagerly explore cutting-edge technologies, the focus intensifies on revamping three-electric systems and power batteries. Rematec Asia holds immense potential. Join us now for a front-row seat to the latest exhibits, captivating demonstrations, and an unparalleled insight into the global remanufacturing industry’s trends. Gain valuable industry information, elevate product promotion, and embark on an exhilarating journey into the forefront of innovation. Don’t miss out—seize the opportunity at Rematec Asia today!

Exhibitors about Rematec Asia

China prioritizes vehicle remanufacturing as a strategic sector to improve resource efficiency, drive sustainable consumption and production, and mitigate waste and pollution in the automotive industry. To achieve success, remanufacturing requires both government support and an awareness campaign. Hence, establishing an exhibition like Rematec Asia becomes vital in showcasing the widespread benefits of remanufacturing to a vast customer base.

- *Manager sales & service of YC Europe GmbH and board member of APRA Europe AISBL, Dipl.-Ing. (TU) Clemens Ortgies*

Remanufacturing aids in reaching carbon peak and neutrality. Rematec Asia fosters global integration and development of the industry, driving the adoption of green, environmentally friendly, and low-carbon consumption. It significantly influences the healthy growth of the auto parts remanufacturing sector.

- *Hebei Changli Auto Parts Co., Ltd., General Manager
Hou Huanhuan*

Rematec Asia strengthens the technical exchange of industry, business, and trade, and builds a very effective platform: it is not only an exhibition, but also an opportunity for cooperation, interaction, and resource sharing, an exhibition, a growth, a step forward, and only through continuous innovation and learning can we provide better products for our customers.

- *Berkeley (Changshu) Electric Co., Ltd., Deputy General
Manager, Weng Yu*

Rematec Asia co-located with the 2023 Auto Parts Remanufacturing International Summit and Auto Aftermarket Guangzhou

The Summit is co-hosted by the Auto Parts Remanufacturing Branch of the China Association of Automobile Manufacturers and the Remanufacturing 50 People Forum. With the theme of "Standardization, Innovation, Green, Low Carbon", it brings together mainstream experts and scholars in the global automotive remanufacturing industry. The Summit will invite leaders of national auto parts remanufacturing industry authorities, authoritative experts from scientific research institutes, insurance companies, OE remanufacturing departments of OEMs, major remanufacturing companies at home and abroad, auto repair companies and parts buyers.

Summit content

- Interpretation of the latest domestic and foreign automobile remanufacturing industry policies
- Release the development trend of domestic and foreign automobile remanufacturing industry
- Helping remanufacturing companies meet the needs of the automotive aftermarket
- Recommend mature auto parts remanufacturing projects at home and abroad

Benefit from co-located event Auto Aftermarket Guangzhou which is the largest automotive aftermarket show in South East China and meet with car manufacturers including MBW, Dongfeng, FAW Group, Geely, Mercedes-Benz, PSA, and Volvo Car Group.

Join Rematec 2023

When & Where

Tuesday 11 – Thursday 13 October 2023
China, Guangzhou Poly World Trade Center, Hall 4

Opening hours

Tuesday 11 October: 09.00 – 17.00 hrs
Wednesday 12 October: 09.00 – 17.00 hrs
Thursday 13 October: 09.00 – 15.00 hrs

Gain a global overview of the industry

Benefit from value added services such as pre-arranged matchmaking appointments, an industry dinner, translation services and excursions to local remanufacturing companies.

- Theater presentations and product launches
- Product certification matchmaking
- Overseas and domestic trade matchmaking
- Guangdong enterprises visiting contact
- National remanufacturing demonstration base pavilion

Exhibition segments

- Remanufactured parts (engine, steering, transmission, front and rear axle, frame, body, lights, battery, etc.)
- Remanufactured repair equipment (repair and testing equipment, cleaning equipment, etc.)
- Old parts and recycling
- Electric Vehicles
- Battery Remanufacturing
- Reverse logistics
- Testing and certification
- Technology R&D and industrial base

Rates 2023

Raw stand space only available from 24sqm for €110 per sqm
International surcharge of € 380,- (this surcharge is obliged).
International surcharge consists of:

- Upgraded construction for standard booth
- Translator (every 3 exhibitors share 1 translator)
- Free newsletter on Rematec Asia WeChat account and website
- Entertainment Dinner
- Site tour after show to 1-2 Chinese Reman factories

How you benefit

- Showcase your products, solutions & knowledge
- Raise your brand profile and awareness
- Reach a global audience in one-stop
- Engage with key decision-makers
- Find new business and new partners
- Generate leads
- Put your experts and expertise on stage

Happy to help

The team consists of experienced professionals, uses extensive databases, stakeholders' network and media relations to build up a valuable platform for the water industry.
